

## Protect your Investment: Care and Maintenance Instructions

All products used in commercial applications should be checked periodically for signs of vandalism, excessive wear and other maintenance concerns.

### Wood Maintenance

- We use unfinished Cedar in our products. Cedar naturally weathers to a soft silver colour. Should you wish to extend the beauty of this natural product, we recommend using Behr Premium Weather-proofing Wood Finish or CIL Woodcare Exterior Stains to protect your bench from the elements. These products are available in clear, semi-transparent or solid coatings.
- Slats should be inspected seasonally for large splits and splinters and replaced if necessary
- Ensure benches are not placed near irrigation systems to avoid splits due to excessive moisture

### Recycled Plastic Maintenance

- Our recycled plastic slats are extremely durable and require only a seasonal cleaning with soap and water
- Scotch-Brite nylon scrubbers can be used to remove heavier stains
- Gouges can be lightly heated over and smoothed

### Powder Coat Finish Maintenance

- Clean as necessary with mild soap and water
- Inspect periodically for chips in the powder coat. Lightly sand and treat with anti-rust paint to any affected areas (satin black finish).

### Replacement Parts and Service

- Replacement hardware and slats are available as needed – call us for pricing.
- Standard Vandal-Resistant hardware provided: Elevator Nut/Button Head Cap Screw
- Optional Hardware available for cost savings: Carriage Bolt/ Washer/Lock Nut
